

**CLINICAL ROTATIONS  
HAZARDS INFORMED CONSENT  
OCCUPATIONAL EXPOSURE INSTRUCTIONS**

While you are out on clinical rotations you **MAY** be exposed to communicable diseases, chemotherapeutic agents, immunizations, or other unforeseen hazards. You are expected to familiarize yourself with the rotation specific institutional policies for exposure to hazards, as well as universal precautions or other accepted general precautions for exposure to disease or hazards.

If you are exposed to contagious disease(s) or hazardous material(s) you should follow the Occupational Exposure Instructions that have been provided to you. These instructions are also posted in the ELMS Document Library in the Rotation Information and Forms section.

Students are responsible for the cost of any healthcare and/or medical treatment that may be needed or required while on rotations. This includes any treatment provided at a site, whether acute or non-urgent care. <https://www.swosu.edu/academics/academic-departments/pharmacy/current-students/experiential-program/students/information.php>

These risks apply to all students. Students who are or may become pregnant during the semester when enrolled in courses with clinical rotations have additional risks to consider to both the unborn child and the mother. Nursing mothers may have increased risk to their infants.

I have read and fully comprehend the above statements of risk, and I have completed the on-line training addressing Occupational Safety and Hazards Administration (OSHA) guidelines concerning blood-borne pathogens for employees in health care settings. I confirm that I have received a copy of the Occupational Exposure Instructions.

My signature on this agreement is valid for all courses taken from the date of my signature until my graduation from the College of Pharmacy program.

# CLINICAL ROTATIONS HAZARDS INFORMED CONSENT OCCUPATIONAL EXPOSURE INSTRUCTIONS

## Occupational Exposures

**If a pharmacy student experiences a hazardous material exposure, students should immediately:**

1. Notify their on-site preceptor; and follow any procedures they have in place
2. Notify their SWOSU faculty advisor if not their on-site preceptor
3. Notify Campus Center for Health & Well-being, 580-774-3776 [susan.ellis@swosu.edu](mailto:susan.ellis@swosu.edu);
4. Notify the Director of Experiential Education, Dr. Christy Cox 405-601-8335  
[christy.cox@swosu.edu](mailto:christy.cox@swosu.edu)
5. Students on IPPE rotations: Also notify the IPPE Coordinator, Dr. Sally Drinnon 580-774-6007  
[sally.drinnon@swosu.edu](mailto:sally.drinnon@swosu.edu)

The Student can contact their PCP for follow-up but can get assistance from the University Nurse to schedule an appointment with a SWOSU physician or may go to a medical clinic of their choice, such as a walk-in clinic, Emergency Room, etc., within 24 hours of the exposure for testing or treatment, if applicable.

- a. If prophylaxis is indicated, it is ideally started within the first 24 hours of the exposure but can be started up to 7 days from the exposure.
- b. All testing and follow up treatment will be managed by the provider of the student's choosing.

The Campus Nurse will:

1. Notify SWOSU's Exposure Control and Education Coordinator.
2. Follow-up with the student as needed.

**If the exposure occurs on a weekend, holiday or outside of normal University hours, students should:**

1. Notify their on-site preceptor and follow any procedures they have in place.
2. Notify their SWOSU faculty advisor if not their on-site preceptor.
3. Notify by e-mail the director for the Center for Health and Well-being, Susan Ellis at [susan.ellis@swosu.edu](mailto:susan.ellis@swosu.edu) and copy the Director of Experiential Education, Dr. Christy Cox [christy.cox@swosu.edu](mailto:christy.cox@swosu.edu); IPPE students should also copy the IPPE coordinator, Dr. Sally Drinnon [sally.drinnon@swosu.edu](mailto:sally.drinnon@swosu.edu). Students should include their phone contact information in the e-mail.

The Student may go to a medical clinic of their choice, such as a walk-in clinic, Emergency Room, etc. within 24 hours of the exposure for testing or treatment, if applicable.

- a. If prophylaxis is indicated, it is ideally started within the first 24 hours of the exposure but can be started up to 7 days from the exposure.
- b. All testing and follow-up treatment will be managed by the student's chosen provider.

On the next business day, the Campus Nurse will:

- a. Notify SWOSU's Exposure Control and Education Coordinator.
- b. Contact the student to ensure they were seen for initial evaluation of treatment, testing and follow-up, if applicable.

As stated in the Experiential Education Manual: *Students are responsible for the cost of any healthcare and/or medical treatment that may be needed or required while on rotations. This includes any treatment provided at a site, whether acute or non-urgent care.* <https://www.swosu.edu/academics/academic-departments/pharmacy/current-students/experiential-program/students/information.php>
